

30W Convection cooled

DC-DC converters

The 30W JTL30 series is housed in a 50.8 x 25.4 x 10.16 mm (2" x 1" x 0.4") metal case. Featuring a 4:1 input voltage range of 9 to 36VDC or 18 to 75VDC with single, dual and triple outputs, singles have 3.3, 5, 12 or 15VDC with duals having either ± 12 or ± 15 VDC, triples offer +3.3V or +5V in combination with either ± 12 or ± 15 VDC. Single output models are adjustable +/-10% with an external trim resistor.

The JTL30 has 1.6kVDC isolation between input and output. Operating temperature range is from -40°C to +75°C, with derating above +50°C. An optional heatsink (-HK) extends the full power operating temperature when fitted. Remote on/off is standard for all models.

Notes:

1. Input current specified at nominal 24V or 48V input.
2. Cross regulation for duals is ±5% when one output is at 100% and the other is varied between 25% and 100%. Cross regulation for triples is ±5% when main output and one auxiliary is at 25% and the other is varied between 25% and 100%.
3. Measured with 1µF ceramic capacitor across output rails.
4. For heatsink option add '-HK' to the end of the part number.
