Precision Thin Film Chip Resistor, Surface-Mount Chip

LINKS TO ADDITIONAL RESOURCES

These chip resistors are available in "wraparound" termination style in a variety of sizes. They incorporate self passivated, enhanced Tantalum Nitride films, to give superior performance on moisture resistance, voltage coefficient, power handling and resistance stability. The terminations consist of an adhesion layer, a leach resistant nickel barrier, and solder coating. This product will out-perform all requirements of characteristic E of MIL-PRF-55342.

CONSTRUCTION
