TPS3800-xx

SLVS219E - AUGUST 1999-REVISED OCTOBER 2010

ULTRA-SMALL SUPPLY VOLTAGE SUPERVISORS

Check for Samples: TPS3800-xx, TPS3801-xx, TPS3802-xx

FEATURES

- Small, 5-Pin SC-70 (SOT-323) Package
- Supply Current of 9 µA
- **Power-On Reset Generator With Fixed Delay** Time
 - TPS3800 = 100 ms
 - TPS3801 = 200 ms
 - TPS3802 = 400 ms
- Precision Supply Voltage Monitor 1.8 V, 2.5 V, 2.7 V, 3 V, 3.3 V, 5 V, and Adjustable
- Manual Reset Input (Except TPS3801-01)
- Temperature Range: -40°C to +85°C

APPLICATIONS

- Applications Using DSPs, Microcontrollers, or **Microprocessors**
- **Wireless Communication Systems**
- Portable/Battery-Powered Equipment
- **Programmable Controls**
- **Intelligent Instruments**
- **Industrial Equipment**
- **Notebook/Desktop Computers**
- **Automotive Systems**

DESCRIPTION

The TPS380x family of supervisory circuits monitor supply voltages to provide circuit initialization and timing supervision, primarily for DSPs and other processor-based systems.

These devices assert a push-pull RESET signal when the SENSE (adjustable version) or V_{DD} (fixed version) drops below a preset threshold. The RESET output remains asserted for the factory programmed delay time after the SENSE or V_{DD} return above its threshold.

The TPS380x devices, except the TPS3801-01, incorporate a manual reset input (MR). A low level at MR causes RESET to become active.

The TPS380x uses a precision reference to achieve an overall threshold accuracy of 2%-2.5%. These devices are available in a 5-pin SC-70 package, which is only about half the size of a 5-pin SOT-23 package.

The TPS380x devices are fully specified over a temperature range of -40°C to +85°C.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

All trademarks are the property of their respective owners.

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

AVAILABLE OPTIONS(1)

T _A	DEVICE NAME	THRESHOLD VOLTAGE	TYP DELAY TIME	MARKING
	TPS3801-01DCK	Adjustable ($V_{ref} = 1.14 \text{ V}$)	200 ms	ARF
	TPS3801E18DCK	1.71 V	200 ms	ARE
	TPS3801J25DCK	2.25 V	200 ms	NJA
	TPS3800G27DCK	2.5 V	95 ms	ARI
–40°C to 85°C	TPS3801L30DCK	2.64 V	200 ms	NPA
-40 C to 65 C	TPS3801K33DCK	2.93 V	200 ms	NWA
	TPS3802L30DCK	2.64 V	380 ms	ASA
	TPS3802K33DCK	2.93 V	380 ms	ARK
	TPS3801T50DCK	4.00 V	25 ms	AVI
	TPS3801I50DCK	4.55 V	200 ms	NSA

⁽¹⁾ For the most current package and ordering information, see the Package Option Addendum at the end of this data sheet, or refer to our web site at www.ti.com.

ABSOLUTE MAXIMUM RATINGS(1) (2)

Over operating free-air temperature range (unless otherwise noted).

	UNIT
Supply voltage, V _{DD}	7 V
SENSE	–0.3 V to 5 V
All other pins	–0.3 V to 7 V
MR	-0.3 V to V _{DD} + 0.3 V
RESET	-0.3 V to V _{DD} + 0.3 V
Maximum low-output current, I _{OL}	5 mA
Maximum high-output current, I _{OH}	–5 mA
Input-clamp current, I_{IK} ($V_I < 0$ or $V_I > V_{DD}$)	±20 mA
Output-clamp current, I _{OK} (V _O < 0 or V _O > V _{DD})	±20 mA
Operating junction temperature range, T _J ⁽³⁾	-40°C to +85°C
Storage temperature range, T _{stg}	−65°C to +150°C

⁽¹⁾ Stresses beyond those listed under absolute maximum ratings may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under recommended operating conditions is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

RECOMMENDED OPERATING CONDITIONS

	LD OI ENATING CONDITIONS			
		MIN	MAX	UNIT
O	TPS3801J25, TPS3801L30, TPS3801K33, TPS3801I50, TPS3801T50	2	6	V
Supply voltage, V _{DD}	All other devices	1.6	4	V
SENSE		0	See (1)	V
Input voltage, V _I		0	V _{DD} +0.3	V
High-level input voltag	e, V _{IH}	$0.7 \times V_{DD}$	V _{DD} +0.3	V
Low-level input voltage	e, V _{IL}		$0.3 \times V_{DD}$	V
Input transition rise an	d fall rate at MR, Δt/ΔV		100	ns/V
Pull-up resistor value,	RESET	V _{Pull-up} 50μΑ		Ω
Operating free-air tem	perature range, T _A	-40	+85	°C

(1) Maximum = V_{DD} + 0.3 or 4.5 V, whichever is greater.

⁽²⁾ All voltage values are with respect to GND. For reliable operation, the device should not be operated at 7 V for more than t = 1000h continuously.

⁽³⁾ Due to the low dissipation power of this device, it is assumed that $T_J = T_A$.

ELECTRICAL CHARACTERISTICS

⁽¹⁾ Status: For more details on status, see our product life cycle.

⁽²⁾ Material type: When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ RoHS values: Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

PACKAGE OPTION ADDENDUM

www.ti.com 23-May-2025

(4) Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
